QUESTION BANK FOR CAE II

SUBJECT: Computer Architecture And organisation

Srno	Question	Unit	BL	CO	PO
1	Describe a virtual memory system along with its memory table for mapping?	III	1	3	1
2	Differentiate between Paging and Segmentation.	III	2	3	1
3	What is Cache Memory? Draw and Explain Block Diagram of Cache Memory	III	1	3	1
4	What is Pipelining ? Explain 5 Stage Pipeline.	IV	2	4	1
5	What is Meant by Hazards in Pipelining ? Explain control hazard .	III	2	3	2
6	Discuss the Basics of Logic Design Convention.	IV	1	4	1
7	Draw and Explain working of Pipeline of Processors.	III	2	3	1
8	Write Difference between RISC and CISC Processor	III	2	3	1
9	Discuss the Memory Hierarchy in computer systems with regards to speed, cost, Size.	III	1	3	1
10	Justify How Parallel Processing improves the performance of the multiprocessor Environment.	III	1	3	1
11	Explain any Page Replacement Algorithm with Example.	III	1	3	2
12	Define the memory . Illustrate the different types of memory..	III	2	3	1
13	Draw and Explain working of a Symmetric Multiprocessor?	III	2	3	1
14	Draw and Explain working of Arithmetic and Instruction pipeline	IV	2	4	1
15	Justify how Pipeline is important in computer	IV	3	4	3

	systems.				
16	Explain Throughput ,Speedup,pipelining Hazard related to pipeline concept	IV	1	4	3
17	Explain Data Path control and Implementation.	IV	2	4	2
18	Explain Exceptions and Interrupts in Pipelining.	IV	1	4	1
19	Explain Control Hazard in Detail.	IV	2	4	3
20	Explain Various types of Hazards in Pipelining.	IV	1	4	3
