

G H Raisoni College of Engineering & Management, Pune
(An Autonomous Institute affiliated to SP Pune University)

S.Y. B. Tech. /Semester- /Div-A/2023-24

Computer Science and Engineering (CS and DS)

MACHINE LEARNING ALGORITHM (UDSL208)

Questions	BL	CO	PO
Q1 . Illustrate Machine Learning Concept with Suitable Examples.	3	1	1
Q2 differentiate between classic and adaptive machines.	2	1	1
Q3 Apply the concept of different types of machine learning in real world scenarios by giving examples.	3	1	1,2,4
Q4 Compare and contrast supervised, unsupervised, and semi-supervised learning approaches, emphasizing their advantages and disadvantages	4	1	2
Q5 Discuss the Machine learning life cycle in brief.	2	1	1
Q6 Compare AI, ML, DL.	4	1	2
Q7 Illustrate the concept of Training vs Testing in machine learning	3	1	1
Q8. Apply the concept of reinforcement learning in real world applications.	3	1	1,2,4
Q9 Determine the learning type in the specified application and elaborate the rationale behind the identification. 1. 2. 3. 4. 5.	4	1	1,2,4
Q10 Illustrate the diagrammatic representation of supervised, unsupervised, and reinforcement learning.	2	1	1
Q11 differentiate between binary classification and multiclass classification	2	2	
Q12 Discuss the concept of performance metrics and it's related terms for binary classification	2	2	

Q13 Describe the one-vs-All approach for multiclass classification.	2		
Q14 Differentiate between one-vs-rest and one-vs-one strategies in multiclass classification. Analyse different scenarios where one approach might be preferable over the other.	4		
Q15 . Apply the concept of SVM for linear regression and classification problems.	3		
Q16 Discuss Perceptron with its applications.	2		
Q17 Analyse the role of kernel methods in SVM for handling non-linearity. illustrate commonly used kernel function.	4		
Q18 . Compare and contrast accuracy, precision, recall, and F1-score in the context of evaluating classifiers.	2		
Q19 Apply the concept of SVM in Health care industries.	3		
Q20 Differentiate soft margin SVM with kernal methods.	2		

<i>Blooms Taxonomy level</i>	1: Remember, 2: Understand, 3: Apply, 4: Analyse, 5: Evaluate, 6: Create
