

**GHRCEM WAGHOLI PUNE**  
**DEPARTMENT OF AI**  
**SY AI A**  
**QUESTION BANK FOR CAE II**  
**SUBJECT: SEPM**

| <b>Sr no</b> | <b>Question</b>                                                                                         | <b>Unit</b> | <b>BL</b> | <b>CO</b> | <b>PO</b> |
|--------------|---------------------------------------------------------------------------------------------------------|-------------|-----------|-----------|-----------|
| 1            | Define the term Software Design. Explain the points that should be considered while designing Software. | III         | 2         | 4         | 1         |
| 2            | Explain Data Design model in detail                                                                     | III         | 2         | 4         | 1         |
| 3            | Explain software Design process in detail.                                                              | III         | 2         | 4         | 1         |
| 4            | Explain different levels of Software Design.                                                            | III         | 2         | 4         | 2         |
| 5            | Compare Layered architecture and data-centered architectures.                                           | III         | 2         | 4         | 2         |
| 6            | Differentiate between Architectural Design and Detailed design.                                         | III         | 2         | 4         | 2         |
| 7            | Describe Heuristic Evaluation in detail.                                                                | III         | 2         | 3         | 2         |
| 8            | Explain the User Interface Design                                                                       | III         | 2         | 3         | 2         |
| 9            | Illustrate Class-based design components and Traditional design components                              | III         | 2         | 3         | 2         |
| 10           | Interpret the User interface design Process along with its issues.                                      | III         | 2         | 3         | 2         |
| 11           | Compare Black Box Testing and White Box Testing                                                         | IV          | 2         | 4         | 2         |
| 12           | Explain the Basis Path Testing in Software Testing                                                      | IV          | 2         | 4         | 2         |
| 13           | Explain the Control Structure Testing in detail                                                         | IV          | 2         | 4         | 3         |
| 14           | Illustrate white box testing in detail                                                                  | IV          | 2         | 4         | 3         |
| 15           | Explain different types of software testing                                                             | IV          | 2         | 4         | 2         |
| 16           | Explain approaches/Strategies of Debugging.                                                             | IV          | 2         | 4         | 3         |
| 17           | Compare Functional testing and non-functional testing                                                   | IV          | 2         | 4         | 2         |
| 18           | Define the term Software Testing. Explain its importance and different levels of testing.               | IV          | 2         | 4         | 1         |
| 19           | Illustrate the Techniques of Black Box Testing                                                          | IV          | 2         | 4         | 2         |
| 20           | Compare between Debugging and Testing.                                                                  | IV          | 2         | 4         | 2         |
